
Subject: Another Lost Decade for U.S. Investors?

SPECIAL BULLETIN *from Richard Band*

Your Retirement Is in **EXTREME DANGER**

Uncle Ben isn't going to save you. The talking heads in
Washington aren't going to save you.

It's up to **YOU** to save your retirement
—and I can help.

Fellow Investor,

Forget Paris... Athens... Dublin... ALL of Europe. We have bigger fish to fry
at home.

No matter what Ben Bernanke said in Jackson Hole a couple of weeks ago...

*"With respect to longer-run prospects, however, my own view is more
optimistic. The growth fundamentals of the United States do not appear to
have been permanently altered by the shocks of the past four years."*

...everything is not "A OK" here in the U.S.

High unemployment, near zero interest rates and poor economic growth ARE doing a heck of a lot of damage to Main Street—and Wall Street, for that matter. And our problems stem from our own lack of fiscal responsibility (not Europe's, Mr. President).

But if our leaders in Washington continue to bury their heads in the sand or try to "pass the buck," the biggest loser will be YOU.

The Facts Are Undeniable

No one wants to admit it... but the situation here in the good ole U.S.A. is growing eerily similar to Japan's.

...*ineffective stimulus packages*, CHECK. Obama's first stimulus package, QE1 and QE2 have done little (if anything) to stimulate the U.S. economy.

...*housing crisis*, CHECK. For every 611 houses in the U.S., one filed for foreclosure in July.

...*high unemployment*, CHECK. The U.S. unemployment held at 9.2% in July, and less than 2 million of the 8.75 million jobs lost in the recession have been recovered.

Award-Winning Advice

For two years running (2010-2011), *Profitable Investing* received the SIPF Financial Advisory Award—and for good reason:

Richard Band is the world's favorite and most successful contrarian advisor.

He believes strongly that your greatest triumphs will come from opportunities that most investors overlook. And after more than 20 years of writing *Profitable Investing*, he's proven this time and time again...

- 2,188% total return, Buckeye Partners, 246 months
- 989% total return, ONEOK Partners, 210 months
- 893% total return, ExxonMobil, 231 months
- 754% total return, Mutual Global Discovery Fund, 219 months
- 304% total return, Kinder Morgan Energy Partners, 112 months
- 202% total return, Occidental Petroleum, 69 months
- 188% total return, Accenture, 75 months

Today, he continues to bring the same award-winning advice and recommendations to his readers, day in and day out. Just consider what you

...*slow economic growth*, CHECK.
Economic growth was just revised to a less-than-expected 1% in the second quarter, as consumer spending remains stagnant.

...*shrinking labor pool*, CHECK.
Companies not only aren't willing to hire, but come 2012, baby boomers will start retiring—which make it even harder to find quality employees.

It's nearly the same situation that played out in Japan. There, the damage was irreparable.

The island nation's economy has never fully recovered from their financial meltdown, suffering not just one but two lost decades. And the picture gets even bleaker when you consider its stock market sold off a whopping 78% since the 1990s. It has yet to make any attempt to reclaim its old highs.

Another Lost Decade Ahead for U.S. Stocks?

What is even more troubling is that U.S. stocks already experienced a "lost decade" between 2000 and 2010—and the economic picture was so much brighter then.

With the constant bickering in Washington and lack of definite, convincing policies to cure the U.S.'s fiscal imbalances, investors' confidence is on the verge of spiraling downward. And another recession is imminent.

could have banked in five of his top recommendations in the past year!

- If you had bought 1,000 shares of Pfizer, it would be worth \$20,060 today.
- 1,000 shares of BT Group would have become \$31,520.
- You could have turned 1,000 shares of Baxter International into \$60,450.
- 1,000 shares in Occidental Petroleum turned into \$103,080.
- Just 1,000 shares of IBM would have become \$184,050.

And the best part: His *Profitable Investing* subscribers banked these massive profits while taking on less risk than the average investor! You see, Richard doesn't just look for the biggest profit opportunities.

He wants big profits *and* safety.

When you join *Profitable Investing* today, you'll receive ALL of the low-risk, high-profit investments that Richard Band recommends—ensuring that you grab your share of the profits.

GET STARTED NOW

The next 10 years is looking very grim for U.S. stocks.

You Can No Longer Rely on a Rising Stock Market for Success

My careful study of the macroeconomic factors leads me to one sad conclusion:

The next "super bull market" will not get under way until at least 2019.

That means you need a strategy that doesn't depend entirely for its success on a rising stock market. You must declare your independence today.

[And I can help.](#)

I'm Richard Band, and here at *Profitable Investing*, I've been helping investors just like you evade every punch Mr. Market has thrown for more than 20 years.

In fact, my *Profitable Investing* recommendations bucked the trend in the first "lost decade" for U.S. stocks, gaining 68.7% vs. the S&P 500's measly 4.6% return.

Putting that into perspective, our stocks created 15 TIMES MORE wealth than if an investor had bought one of the (then) wildly popular S&P 500 index funds.

How did we do it? I'll let you in on my entire strategy when you [join *Profitable Investing*](#), but our most important moves are more powerful than ever:

1. Boost your holdings of intermediate-term bonds.
2. Buy dividend-rich blue chips.

[I guarantee if you apply the same two-step strategy as my *Profitable Investing* subscribers employed then and are following now, you could also sidestep what could very well be U.S. stocks' second "lost decade."](#)

Just consider this:

When stocks fall, the prices of high-quality bonds climb. Even before the stock market rout in August, the S&P 500 was down nearly 5% year to date. But here at *Profitable Investing*, we locked in a 10% total return in PowerShares Build America Bond Portfolio in just 9 months.

Talk about great insurance!

Starting today, my favorite two bond funds will give YOU the same level of security and cushion YOU against any market tumble—plus pay you a average 3.37% yield. [Get their names when you join us at *Profitable Investing* today.](#)

And as the going gets tougher for the stock market, the strongest and safest companies will attract cash from investors fleeing weaker stocks. Defensive blue chips fit the bill to a "T." Their high dividend yields protect them from the market's sharp dips, and they've been proven to hold up best in bear markets.

Want proof?

ACT NOW

Just do a stock screen... look for large-cap stocks with at least a 3% dividend yield or higher, positive earnings and sales for the last five years, and positive sales projections for the next five years.

You'll get a list of about 51 names—we own nearly half of them at *Profitable Investing*.

The reason why is simple: They outperform—and line our pockets with a lot of green. In fact, here are 5 currently on our *Profitable Investing* buy list, and ready for you to buy right now:

	YTD Gains	8-Year Gains
Blue Chip #1	+7%	+240%
Blue Chip #2	+18%	+376%
Blue Chip #3	+12%	+155%

Blue Chip #4	+9%	+140%
Blue Chip #5	+4%	+130%
S&P 500	-7%	+14%

The *Profitable Investing* Difference

We all know you can't make a fortune overnight.

Get-rich schemes are just that... schemes. A lot of flowery promises that take unsuspecting investors for a ride and then steal their wallets.

But if you want to safely build your wealth, it takes time.

That's why at *Profitable Investing*, you won't see recommendations for risky, small-cap stocks that knee-jerk react every time the market shifts higher or lower. Ever.

We only pick up investments that have the potential to protect our retirement from the Mr. Market's temper tantrums and stocks that can dramatically build our wealth over the next 5, 10, 15 (or more!) years.

To do this, I look through the other end of the telescope. A narrower focus lets me zero in on a small group of stocks that will give you big profits *and* safety.

That's why here at *Profitable Investing*, we follow a simple two-step strategy:

Join Risk-Free!

1. Determine where you can invest with a low probability of losing money.
2. Choose the low-risk opportunities that offer the biggest profits.

It's a safety-first approach that's stood the test of time—and rewarded my subscribers year after year:

My *Profitable Investing* recommendations have QUADRUPLED my readers' money since 1990.

[And today, you can put it to work for you completely risk-free.](#)

My 100% Money-Back Guarantee Promises You'll Profit —or You Won't Pay a Penny

You don't have to just take my word that you will get safe and consistent profits with *Profitable Investing*. I'll put my money where my mouth is.

[Take a full six months to try *Profitable Investing* on me.](#)

Here's how it works: If at any time during your six-month trial period—even the very last day—you're not 100% satisfied with *Profitable Investing* for any reason at all, simply give me a call. You can cancel for a full refund.

I will personally send you every single penny of you subscription fee back—no questions asked.

But that's not all. Even after your six-month introductory period, if you decide *Profitable Investing* isn't right for you, I'll send you a full refund for the balance of your subscription.

It's as simple as that.

You receive all the details on my 30-year road-tested strategy... my complete buy list of low-risk, big profit opportunities... the names of my top two bond funds and 5 favorite blue chips... AND you will receive my new special report, *Your Self-Defense Kit: How to Protect Your Retirement When the Market Plunges*...

...Yet you risk nothing!

[So what are you waiting for? Click here to join *Profitable Investing*.](#)

I Guarantee It Will Be the Last Newsletter You Will Ever Buy

Now, I'm not one to pat myself on the back. But... my low-risk, big profit strategy has paid off even greater than anyone could have ever imagined:

- ✓ In 1982, Chrysler was considered D.O.A., and I shocked the Street when I said, "Chrysler is going to survive to fight another day." **Within 12 months, Chrysler shares soared 426%.**

- ✓ In 1998, right at the bottom of the August market panic, investors were fleeing to the hills. I pounded on the table for my *Profitable Investing* subscribers to buy stocks with both hands. **Our recommendations have risen as much as 500% since then.**
- ✓ In 2000, when everyone had a bad case of technology fever, I recommended all the unpopular investments like REITs. We avoided a more than 90% plunge, and **we banked a more than 250% profit in a single REIT.**
- ✓ In 2003, investors shunned the Midas metal. But I once again went against the crowd, recommending a single mining stock and low-risk gold fund. **Within five months, we locked in more than 50% profits.**
- ✓ Even in the 2008 bear market, I steered my readers away from wealth-stealers like Health Management (-77%) and Tenet Healthcare (-80%). **Instead, we pocketed big winners like Unibanco (102%) and Chesapeake Energy (121%).**

It's for these reasons that I can promise safe, consistent and BIG profits year after year—[AND that *Profitable Investing* will be the last newsletter you'll ever have to buy.](#)

Join *Profitable Investing* for Just \$99.95 Today

The odds that President Obama and Congress will play nice are slim—which is bad news for Main Street *and* Wall Street.

If our leaders in Washington don't take the necessary steps to implement real policies in the next 3 to 4 months, we're facing another recession—and it's lights out for U.S. stocks.

[You must ACT NOW to protect your retirement.](#)

That's why you have just 24 hours to accept my special 60% savings offer: You can join *Profitable Investing* for \$99.95—and I'll immediately send you your FREE copy of *Your Self-Defense Kit: How to Protect Your Retirement When the Market Plunges*.

[Click here to get started now.](#)

Sincerely,

Richard Band

Editor, *Profitable Investing*

P.S. The U.S. is at a very important crossroads right now: We can either enact policies to cure America's fiscal imbalances or follow in Japan's footsteps. I've got my fingers crossed that our leadership in Washington can pull it together, but I'm not taking any chances—and neither should you.

My just-released special report, *Your Self-Defense Kit: How to Protect Your Retirement When the Market Plunges*, will show you exactly what steps you must take today to protect your wealth.

[Download your FREE copy now.](#)

P.P.S. Don't forget. You have just 24 hours to accept my special \$99.95 offer. But you have a full six months to take *Profitable Investing* for a test-drive.

My **100% Money-Back Guarantee** promises you'll protect your wealth in the coming market swoon and build your profits in select dividend-rich blue chips—or I'll personally refund every penny of your subscription fee at any time during your six-month trial period.

[Click here to get started now.](#)
